

Drug Treatment Program Evaluation	
Project:	Evaluation of the Drug Treatment Center (DTC) in Tirin Kot, Uruzgan
Donor:	AusAID and Save The Children International
Start Date:	Aug 2013
Duration:	3 Months
Objectives:	The purpose of this evaluation was to determine whether the DTC adheres to best practices and current approaches in drug dependency treatment and whether there are lessons to be learned for further improving the project.
Methodology:	The evaluation used a mixed methods approach, with collection of qualitative and quantitative data, in three chief exercises: focus group discussions and in-depth interviews with key stakeholders (e.g. former and current patients and their families, Ministry of Counter-Narcotics (MoCN) and Public Health (MoPH) officials), direct observation of facility resources and activities, and a relapse survey of former patients.
Findings:
